## Notes - DVA Pensioner Summary - September 2019

### **Method of extraction**

The data used for this publication were extracted using “the current date” method of extraction which read data as at 27/09/2019. Please note that figures can be slightly overstated because of normal delays in processing death cases.

Data are extracted on both 'eligibility' and 'payability', i.e. on the basis of a client not only being entitled to receive a benefit, but also in actual receipt of the benefit/s or payment.

### **Data integrity**

The numbers shown in the publication reflect the data currently stored in the Department's client database. Any inaccuracies existing in the publication may be attributed to data entry errors or various data conversions in the past. All due professional care is taken in correcting such errors, especially where they can be readily detected, by amending the client statistics as necessary. However, many errors are hidden within large aggregate numbers requiring extensive reconciliation and verification processes for detection. Such inconsistencies are actioned by business areas as they are detected.

### **Conflict groupings**

For tables 5 and 6, reporting on veterans receiving Service Pension, conflict has been determined using SP entitlement code, which records the conflict from which the veteran has qualifying service. Veterans who have qualifying service from more than one conflict will only be counted in a single conflict, usually the earliest.

From September 2013, all other tables by conflict, including tables for war widows and orphans, now count pensioners under each conflict from which the veteran has one or more accepted disabilities. For example, a veteran who served in both East Timor and Afghanistan and has one or more accepted disabilities partially or wholly attributed to both of these conflicts will be included in each. Where a veteran has no accepted disabilities attributed to operational service or if conflict is unknown, he or she is counted only in the 'Non-operational Service' group. This revision of conflicts results in a more accurate indication of the number of veterans with disabilities attributed to each conflict. However, because a veteran can now be included in more than one conflict, individual conflicts can not be summed. The 'All Wars' figure is a net total, exclusive of any overlaps across conflicts. Net totals for other conflicts, such as Afghanistan and Iraq, can be provided on request.

Because of this change, tables by conflict are not directly comparable with those from reports prior to September 2013.

### **Tables with "state"**

Prior to June 2009 tables with "state" were based on state of processing, not state of residence. ACT and the NT were included in the NSW and South Australian results respectively, with overseas residents included in the Tasmania figure. From June 2009 onwards residential address is used with ACT, NT and overseas reported separately.
